Maria Sultana

Software Engineer — iOS, Flutter, Web — ICPC Regionalist

@ mariasultanaprofessional@gmail.com | LinkedIn | GitHub | Dhaka, Bangladesh

Professional Summary

Software engineer with 1+ year of production iOS experience building Samsung SmartThings features. Delivers maintainable Swift applications using UIKit, SwiftUI, TDD, and modern concurrency; brings strong algorithms foundations from 1,600+ solved problems and ICPC competition.

Experience

Samsung Research & Development Bangladesh (SRBD) — Dhaka, Bangladesh

iOS Software Engineer, SmartThings iOS [App Store Link] — *Aug 2025 – Present*

- Develop and maintain iOS features for SmartThings, a large-scale IoT application used by millions of users, as part of a cross-functional engineering organization of 50+ members.
- Completed structured iOS onboarding by building a fully functional application from scratch with Swift and UIKit, applying MVVM-C, ReactiveSwift, test-driven development, and Redux architecture.
- Built a fully functional Widget using WidgetKit and Live Activities for a core SmartThings module and implemented Camera Service features supporting Ring, Arlo, Google Nest, Aqara, Aeotec, and Matter-based cameras.
- Refactored the Camera module to improve loading performance and resolved critical production issues, including application crashes, while improving code maintainability through TDD.
- Collaborate with Samsung's Suwon headquarters on feature design, technical implementation, and business requirements.
- Created class, activity, and sequence diagrams that improved the clarity and usability of module documentation for engineering stakeholders.
- Use Git and GitHub CLI workflows for pull requests, rebasing, and merge-conflict resolution; manage work items and team communication through Jira and Slack.
- Apply Swift concurrency, ReactiveSwift, and Combine, and use Samsung internal AI tools and external AI agents to support analysis and software-development workflows.

Nogor Solutions Limited — Gulshan, Dhaka, Bangladesh

Industrial Trainee — Software Engineering — Quality Assurance — *Feb 2024 – Mar 2024*

- Authored an SRS, performed end-to-end testing, surfaced critical defects, and recommended user-flow improvements using HCI principles.
- Collaborated with system analysts to understand architectural patterns and professional software-delivery practices.

MIST Computer Club — Dhaka, Bangladesh

Vice President, Committee of Competitive Programming — *Dec 2023 – Jun 2025*

- Led committee operations and coordinated competitive-programming events for the university computer club.

MIST Computer Club — Dhaka, Bangladesh

Executive Member — *May 2023 – Dec 2023*

- Mentored junior students in competitive programming and structured problem-solving.

Notable Projects

KeepFresh: iOS Expiry Tracker ***GitHub*** — *July 2026 – Present*

Swift, UIKit, SwiftData, Firebase Auth

- Built an iOS app that helps users cut food or product waste by tracking product expiry dates, featuring a color-coded (expired / expiring soon / good) inventory, category-based search and filtering, and scheduled local push reminders before items expire.
- Implemented in programmatic UIKit using MVVM-C architecture with local SwiftData persistence and protocol-based service boundaries for testability.

QuickDeal: Marketplace Platform ***GitHub*** — *Jan 2025 – Jul 2025*

Flutter, Dart, Firebase, Supabase, Riverpod

- Built a marketplace where clients request quotes and vendors bid, with role-based access, real-time updates, digital agreements, and payment workflows.

Smart Cafeteria App ***GitHub*** — *Mar 2024 – Oct 2024*

Flutter, Firebase

- Created an Android food-ordering app for a campus cafeteria, reducing queueing during peak hours.

BongoJourney: AI-Based Tour Planner ***GitHub*** — *Aug 2023 – Dec 2023*

React.js, Node.js, Express, MongoDB, Flask

- Built a full-stack tour-planning system that generates personalized, AI-assisted travel plans from user requirements.

Smart Printing System ***GitHub*** — *Mar 2023 – Jul 2023*

React.js, Node.js, Express, Oracle SQL

- Created a full-stack app for finding nearby print shops, placing orders, tracking status, paying, and submitting reviews.

Problem Solving

- ***Codeforces Specialist*** (Highest Rating: 1441) Handle: Maria_Sultana
- ***CodeChef 3-star*** (Highest Rating: 1663) Handle: maria_sultana
- Solved 1,600+ problems across Codeforces, CodeChef, *LeetCode*, and other *online judges*.

Programming Contests

- **6th / 104 teams, National Girls' Programming Contest 2022** *Feb 2023* — Team MIST_Object_Grind *Standings*
- **7th / 140+ participants, Luna Shamsuddoha All Girls' Programming Contest 2023** *May 2023* *Standings*
- **33rd / 309 teams, ICPC Asia Dhaka Regional Contest 2024** *Dec 2024* — Team MIST_FrostByte_2.0 *Standings*
- **56th / 114 teams, BUET Inter-University Programming Contest 2024** *Nov 2024* — Team MIST_FrostByte_2.0 *Standings*

Achievements

- **Notable programming-contest results:** 4th, Independence Day Programming Contest 2023; 6th, National Girls' Programming Contest 2022; 7th, Luna Shamsuddoha All Girls Programming Contest 2023; and 2nd runner-up, MIST Intra-Department Girls' Programming Contest.
- **Runner-Up, MIST Solo Blind Contest** *Oct 2023*
- **Top 10, Robo Soccer, Chittagong Science Carnival 2.0** *May 2022*
  Team MIST_Black_Bird
- **MIST Dean's Award 2022:** Listed in the MIST Dean's Award. *View award*

Skills

Languages: C++, C, Swift, Kotlin, Java, Python, JavaScript, SQL, Bash

Mobile: SwiftUI, UIKit, WidgetKit, Live Activities, AVFoundation, Combine, ReactiveSwift, Flutter, Firebase

Web & Databases: React.js, Node.js, Express, Flask, MongoDB, Oracle SQL

Tools & Practices: Git, GitHub, Jira, Slack, UML, Object-Oriented Programming, MVVM-C, Redux Architecture, TDD, Agile Collaboration

Education

Military Institute of Science and Technology Dhaka, Bangladesh
B.Sc. in Computer Science and Engineering; ***CGPA: 3.73 out of 4.00*** *Apr 2021 – Jun 2025*
